

## Assignment 2

1.

Name	Phone Number	Fetch	Add/Remove
<input type="text"/>	<input type="text"/>	<input type="button" value="Fetch"/>	<input type="button" value="+"/> <input type="button" value="-"/>

Design a table as shown in above figure.

Column 1 contains textbox

Column 2 contains textbox

Column 3 contains button

Column 4 contains 2 buttons (add/ remove)

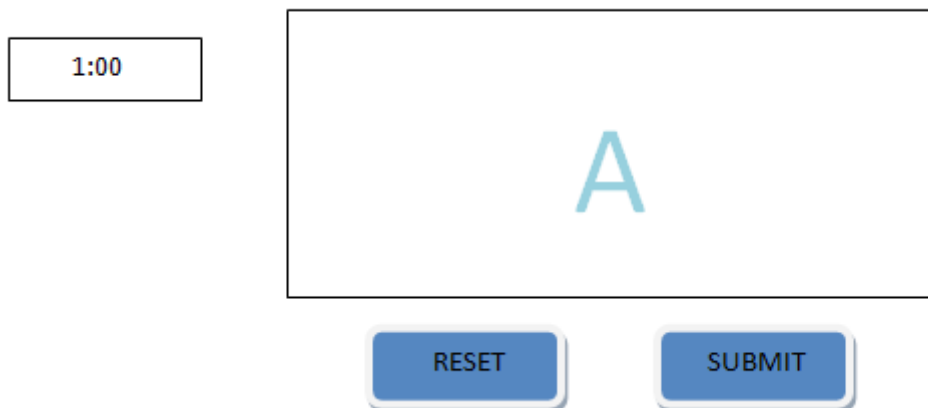

When add button is clicked a new row is added to table which has all the contents as in previous row.

When remove button is clicked the current row gets deleted.

When fetch button is clicked the phone number and name is fetched and displayed in alert box.

2.

Design a Canvas alphabet practice board.

User should be able to draw on the canvas using the mouse cursor. On click of reset button a new alphabet should be displayed on screen. Also add a timer that resets for every one minute when the new alphabet loads. On click of submit button timer should stop.

3.

Design a video chat application where two users can video chat in real time with each other using WebRTC. Also add a real time message chat functionality using web sockets. Make application look appealing using CSS3.

Use XHTML in 1<sup>st</sup> Question

Use HTML5 in 2<sup>nd</sup> Question

Use CSS3 in 3<sup>rd</sup> Question
